TORNADO

When it comes to mixing fresh styling with high value it's no surprise that the Tornado has been an integral part of the Lexmoto range for so long. The model is easy to use and features great reliability and economy through the use of its 4T air-cooled motor. As an agile scooter featuring great acceleration the model is equally at home whether it's on the day to day commute or simply for the joy of riding. The Tornado is a model that shows us that fun is still very much alive in twist and go scooters
